

# CUTTERS

## Single Operator Hydraulic

The hydraulically actuated scissors are designed for a variety of field cutting tasks, including up to 16 mm thick treated steel and up to 20 mm thick untreated steel. The scissors can be ordered in a wide range of models, for a variety of requirements, including a shoulder model. The scissors are unique in their light weight, portability and suitability for a wide range of operational needs. The units are operable independently of external power sources, manually and hydraulically operated models are available. Most models can be operated by only one person.
